FOREWORD BY THE MINISTER OF ROADS & HIGHWAYS

1. The Ministry of Roads and Highways, through its oversight responsibility, maintained focus on routine and periodic maintenance activities, minor and major rehabilitation as well as upgrading works on the paved and unpaved network.
2. Prior to HE President Nana Addo Dankwa Akufo-Addo coming into office on January 7, 2017, the country had a total road network of 78,402km, of which 23% was paved and 77% was unpaved. At the end of 2016, only 39% of the road network was in good condition, 32% in fair condition and 29% was in poor state.
3. The road network as inventoried today is estimated at 94,203km, with 27% paved and 73% unpaved. We have therefore increased the stock of our paved roads despite the expansion in the network size. The interventions over the last (Six) 6 years have led to a marked improvement of Ghana's road network to 44% good, 34% fair and 22% poor, that is, a 7% reduction in the proportion of roads in poor condition.
4. Between 2009 and 2016; only Five (5) interchanges/overpasses were constructed and completed in this country. In the last (Six) 6 years, we have completed and added (Six) 6 more. On top of that, (Seven) 7 additional new interchanges are currently under construction. These are namely, Nungua, Adjiringanor, PTC in Takoradi, Flower Pot, Kpong Barrier, Savanna, Dawhenya, Prampram and Obetsebi Lamptey Phase 2. These, together with others are scheduled for completion before the end of 2024. This will mean that HE Nana Addo Dankwa Akufo-Addo will have added more interchanges during his tenure than all other administrations before 2017.
5. The work done by the Akufo-Addo administration nationwide to facilitate road travel has indeed been phenomenal. At the end of 2016, only 135km (27%) of the Asikuma Junction to Gbintri section

of the Eastern Corridor Road was in good condition. As at the end of 2022, 366km (74%) of the section had been improved from poor to good state. This has significantly impacted positively on the movement of goods and people along that critical corridor, particularly for farm produce.

6. In the President's message on the state of the nation in 2022, last year, he indicated that his Government had completed 10,875km of roads around the country. Owing to the investments in the road sector, an additional 1,100km have been completed since then bringing the total length of completed roads to 11,975km. In addition, Thirty-Three (33) bridges have also been completed around the country.
7. Major highlights include 1,807km of asphalt overlays, 615km of construction and 1,818km of upgrading have been undertaken on the road network whilst 6,094km of gravelling/regravelling works have been undertaken on the unpaved network.
8. In addition to the completed road works as indicated, 2,419 projects have been committed for execution nationwide. We will ensure the realization of the objectives of these projects.
9. My Ministry, upon the directive from the President, is glad to present to Members of Parliament evidence of roads completed nationwide under President Akufo-Addo. Uncompleted roads have been excluded. It is our solemn hope that this catalogue of evidence will go a long way in responding to questions about what public funds have been spent on.

Thank you.

HON KWASI AMOAKO -ATTAH
MEMBER OF PARLIAMENT, ATIWA WEST,
MINISTER OF ROADS & HIGHWAYS.

1. NETWORK INVENTORY (2017 VS 2022)

**MINISTRY OF ROADS & HIGHWAYS
